

MOHAMMED SHAHID

AUTOMATION TESTER

Chennai, 600073 | SHAHID.SDET@GMAIL.COM | +91 74183 93706

OBJECTIVE

To obtain a challenging position as an SDET where I can leverage my strong organizational skills, technical expertise, and ability to collaborate effectively. Passionate about continuous learning, adapting to new technologies, applying systems thinking, and contributing to company growth through performance-oriented and fault-tolerant solutions

PROFESSIONAL SUMMARY

- **2.5 years** of experience in **Software Testing** with strong expertise in **Quality Assurance** methodologies, proficient in both **Manual** and **Automation Testing**.
- Proficient in developing robust **Selenium WebDriver** automation scripts using **Java**, with hands-on experience in **BDD** and **TDD** frameworks like **Cucumber** and testing frameworks such as **TestNG** and **JUnit**. Skilled in build automation and dependency management using **Maven**.
- Implemented **Continuous Integration** by integrating the automation framework with **Jenkins** for efficient build and test cycles.
- Extensive experience in **data warehousing** and decision support systems, with strong expertise in relational database development using **MySQL**.
- Extensive experience in the **Software Development Life Cycle (SDLC)** and **Software Testing Life Cycle (STLC)**, with a strong background in **Agile** methodologies, including **Scrum**.
- Experience in designing and implementing data-driven automation frameworks using **Selenium WebDriver**, **Java**, and **TestNG**, following the **Page Object Model (POM)** design pattern.
- Experience in **Git** for version control and **JIRA** for bug tracking and test management.
- Skilled in cross-browser testing (**Edge**, **Firefox**, **Chrome**) on **Windows** and **Linux**.
- Experienced in **API** testing using **Postman** and **Rest Assured**.
- Strong communication and collaboration skills, highly adaptable and self-motivated, with excellent organizational and multi-tasking abilities; a committed autodidact with a passion for continuous learning.

TECHNICAL SUMMARY

- Programming Language : Java
- Testing Tools : Selenium WebDriver
- IDEs : Eclipse, VS Code
- Test Frameworks : JUnit, TestNG, Cucumber
- Databases : MySQL
- Build Tools : Maven
- Web Technologies : HTML, XML
- Version Control : Git / GitHub
- CI/CD Tools : Jenkins
- Bug Tracking Tools : JIRA
- API Testing : Postman, Rest-Assured

EDUCATION

B.Tech IT

2020 | Info Institute of Engineering | Coimbatore, 641107

PROFESSIONAL EXPERIENCE

- Worked at Learning Links Foundation (Dec 2022 – Aug 2025)

PROJECT OVERVIEW

- **Project #1:**
 - Project : IntelliLearn
 - Client : Learning Links Foundation
 - Domain : Education Management & Adaptive Learning
 - Framework : Cucumber
 - Bug Tracking Tools : Jira
 - Automation Tools : Selenium WebDriver UI
- **Description:**
 - This web-based application manages employees like teachers and provides content aligned with state syllabi. It features a personalized adaptive learning system that creates custom learning paths for students after assessments, adapting automatically to individual knowledge levels to deliver tailored content. It supports administrative staff and senior management in monitoring learning outcomes and teacher activities.
- **Roles and Responsibilities:**
 - Analyzed functional specifications and requirements to understand application features and user workflows.
 - Designed and executed test cases for functional, regression, integration, and usability testing.
 - Documented test results and tracked defects using Jira, collaborating with developers for validation.

- Performed exploratory testing to uncover edge cases and usability issues.
- Learned **Selenium WebDriver** and **Cucumber**, leading to promotion to Automation Tester.
- Planned, developed, and maintained UI automation scripts for teacher management and adaptive learning workflows using **Selenium WebDriver**, **Cucumber**, **POM**, and **Maven**.
- Integrated automated tests into Jenkins for **CI/CD pipelines**.
- Managed version control via **Git** and defect tracking in **Jira** throughout both phases.
- Created automated test cases covering personalized learning pathways, assessment workflows, and syllabus-based content delivery.
- Enhanced automation scripts for error handling, dynamic content testing, and performance optimization.
- Participated in daily scrums, sprint reviews, and retrospectives, ensuring project quality and delivery timelines.

I confirm that the information provided above is accurate to the best of my knowledge.
